

Say YES to fairness

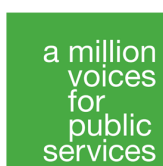

For school support staff

The new School Support Staff Negotiating Body was set up to negotiate national pay and conditions for school support staff. The coalition government has abolished the SSSNB leaving schools with demoralised staff facing an uncertain future.

Our teaching assistants, cleaners, kitchen staff, caretakers, play workers and school business managers – to name a few – deserve a national pay and grading framework, which would create consistency and fairness in schools. They support both pupils and teachers and help schools to run smoothly and efficiently.

We call upon the Secretary of State for Education to ensure the completion of the national pay and grading framework to ensure stability and fairness for school support staff.
