

Are you a healthcare **student?**

Join the
UNISON
that gets it **RIGHT**

UNISON is the union that delivers for members – whether it's a bigger pay rise, more money for new starters in the NHS or getting people to the rate for the job quicker. UNISON is at the forefront of making life better for NHS staff.

We are the experts on NHS pay and the NHS pay structure – after all we negotiated it. We understand the importance of getting good deals done – something that will benefit you when you qualify – and of giving members accurate advice about their pay and other terms and conditions.

A great deal for students

We also understand the importance of giving student members a good deal. That's why, when you join UNISON, you get all the benefits of full membership, including contingent professional indemnity insurance. Plus great information and advice to help you with your studies and your practice placements. You have access to our network of properly trained and well-informed representatives who know what is happening about pay and all the other issues NHS staff face.

UNISON
that gets it **RIGHT**

They also understand the demands of being a student in the NHS and are there with help and advice when you need it.

And UNISON is not just about help while you are studying or on your placement. We have a range of services that help you outside of work too, including debt advice and special deals and discounts for UNISON members and their families.

Just £10 a year

You get all this for £10 a year while you are studying – that's £10 a year to be part of the largest union in the NHS. The union that is leading the way in getting a better deal for NHS staff and the union you will want to belong to as you study and when you qualify.

Join the union that is getting it right for members, for students and for the NHS and the people it cares for.

Not in UNISON?
